

Educating Future Therapeutic Riding Specialists

Octavia J. Brown¹

ABSTRACT:

At the Ninth International Therapeutic Riding Congress, held in Denver, CO in July, 1997, two forums were held for the exchange of ideas on issues of education for personnel working in the field of therapeutic riding. In addition, a number of informal discussions were held on the same subject. This paper outlines the subjects discussed at these session, and outlines the steps undertaken by the FRDI to address the issues raised.
